SIMMERING MEALS AND CEREALS
Procedures for cooking meals and cereals such as polenta and oatmeal differ somewhat from procedures for cooking whole grains. Cracked or flaked cereals such as rolled oats consist of large particles. They are usually stirred into boiling water. Because of the size of the particles, there is little danger of lumping.

Granular meals such as cornmeal can be stirred into boiling water if care is taken to add the grain slowly and to stir constantly and vigorously while doing so, in order to avoid lumps. See the recipe for polenta (p. 654). Alternatively, combine the meal with cold liquid, stir, and bring to a simmer while continuing to stir. Mixing the meal with cold liquid separates the granules to prevent lumping.

Procedure for Simmering Whole, Cracked, or Flaked Cereals

1. Measure the correct amount of liquid into a pot and bring to a boil.
2. Measure the correct amount of meal or cereal.
3. Add the cereal slowly to the boiling liquid, stirring constantly.
4. Stir until some thickening takes place. Depending on the grain, continue to stir constantly, or stir only occasionally. Some cereals, such as oatmeal, become gummy with excessive stirring.
5. Reduce heat to a slow simmer and cook to desired doneness and consistency.
6. To prevent drying, keep the cooked grain covered until serving.

Variation: Simmering Meals and Granular Cereals
The procedure is the same as above, except the cereal is mixed with cold liquid. This separates the grains to prevent lumping. Place the mixture in a pot, bring to a simmer, and cook as in the basic procedure.

THE PILAF METHOD
The pilaf method is equivalent to braising. The grain is first sautéed in fat and then cooked in liquid—preferably in the oven for uniform heating—until the liquid is absorbed (see Figure 19.1). The fat helps keep the grains separate and adds flavor.

Figure 19.1 Making rice pilaf.

(a) Sweat the onion or shallot.
(b) Add the rice and sauté briefly.
(c) Pour in the hot stock or other liquid.
(d) Bring to a boil and cover. Cook at low heat on top of the stove or in the oven for the required time.
(e) The finished pilaf.
It is normal to measure rice by volume when making pilaf, as the proportions are based on volume measure. One pint of raw rice weighs about 14 ounces, or 1 pound measures about 2½ cups (1 L weighs about 875 g; or 1 kg measures 1.15 L). Regarding exact measurements, see the note following the pilaf recipe.

**Procedure for Cooking Grain by the Pilaf Method**

1. Heat the desired fat (such as butter or olive oil) in a heavy pan. Add chopped onion or other aromatic vegetable, if desired, and sauté until soft but not browned.
2. Add the grain. Stir to coat the grains with fat.
3. Cook the grain in the fat, stirring, to toast the grain lightly.
4. Add the proper amount of hot liquid.
5. Bring to a simmer, stirring occasionally.
6. Cover tightly. Cook on the stovetop or, preferably, in an oven, for the correct length of time, depending on the grain.
7. Remove from the heat and let stand, covered, to allow the moisture to be absorbed uniformly by the grain.

**THE RISOTTO METHOD**

Risotto is a classic Italian preparation made by a special procedure that is like neither the boiling method nor the pilaf method. After sautéing the rice, add a small amount of hot stock or other liquid and stir until the liquid is absorbed. Repeat this procedure until the rice is cooked but still firm. Risotto should be served quickly, as it does not hold well. The finished product has a creamy consistency due to the starch that is cooked out of the rice. The grains are not fluffy and separate.

The word *risotto* comes from the Italian word *riso*, meaning “rice.” Other grains can be cooked using the same method, although strictly speaking they should not be called *risotto*. In Italy, farro cooked by the risotto method is called *farrotto*, and orzo pasta cooked this way is called *orzotto*. In the English-speaking world, however, the word *risotto* is more likely to be understood and is often used on menus, but with the grain specified if any type other than rice is used. For example, farro might be called *farro risotto*.

**Procedure for Cooking Grain by the Risotto Method**

1. Heat the desired fat (such as butter or olive oil) in a heavy pan. Add chopped onion or other aromatic vegetable, if desired, and sauté until soft but not browned.
2. Add the grain. Stir to coat the grains with fat.
3. Cook the grain in the fat, stirring, to toast the grain lightly.
4. Add a small amount of boiling liquid. Cook slowly, stirring, until the liquid is absorbed by the grain.
5. Add a second small quantity of liquid and repeat the procedure.
6. Continue adding a small quantity of liquid at a time, stirring constantly, and waiting until the liquid is absorbed before adding more.
7. Stop adding liquid when the grain is tender but still firm. It should be moist and creamy but not runny.

**KEY POINTS TO REVIEW**

- What are the steps in the basic procedure for simmering rice and other grains?
- How is the procedure for cooking cracked and flaked cereals different from cooking meals or granular cereals?
- What are the steps in the procedure for cooking grain by the pilaf method?
- What are the steps in the procedure for cooking grain by the risotto method?

Per 5 oz (150 g) serving: Calories, 190; Protein, 4 g; Fat, 5 g (23% cal.); Cholesterol, 15 mg; Carbohydrates, 33 g; Fiber, 1 g; Sodium, 50 mg.

Note: Rice for pilaf is measured by volume rather than by weight. Use 1½–2 times its volume in stock or water (1½ times is the normal proportion for long-grain rice). For example, use 2 pints liquid per pint of rice (1 L liquid per 0.5 L rice) if you desire a moister product or if you are using parboiled rice. Use 1½ pints (0.75 L) liquid if you desire a drier product and if your cover is tight enough to retain most of the steam.

**PROCEDURE**

1. Heat the butter in a heavy saucepan. Add the onion and sauté until it begins to soften. Do not brown.
2. Add the rice, without washing. Stir over heat until the rice is completely coated with butter.
3. Pour in the boiling liquid. Return the liquid to a boil with the rice. Taste and adjust seasonings; cover tightly.
4. Place in a 350°F (175°C) oven and bake 18–20 minutes, or until liquid is absorbed and rice is dry and fluffy. Taste the rice and, if it is not done, replace in oven 3–5 minutes.
5. Turn out into a hotel pan and fluff the rice with a fork. This releases steam and prevents further cooking. Keep hot for service.
6. If desired, additional raw butter may be stirred into finished rice.

**VARIATIONS**

**Tomato Pilaf**
Prepare as in the basic recipe, using 12–16 oz (375–500 mL) chicken stock and 1½ lb (700 g) chopped tomatoes with juice.

**Spanish Rice**
Prepare like Tomato Pilaf, but use bacon fat and sauté 6 oz (175 g) diced green bell pepper, 1 crushed garlic clove, and 1 tbsp (15 mL) paprika with the onion.

**Turkish Pilaf**
Sauté ¼ tsp (1 mL) turmeric with the rice. To finished rice, add 4 oz (125 g) tomato concassé or drained, chopped canned tomatoes, 4 oz (125 g) cooked peas, and 4 oz (125 g) raisins (soaked and drained). Let stand 10–15 minutes before serving.

**Cracked Wheat Pilaf**
Prepare as in the basic recipe, using cracked wheat instead of rice.

**Orzo Pilaf**
Prepare as in the basic recipe, using orzo (rice-shaped pasta) instead of rice.

**Barley Pilaf**
Prepare as in the basic recipe, using pearled barley instead of rice. Use 2½ pints (1.25 L) stock and bake 45 minutes. Mushrooms are often added to barley pilaf.

**Additions to Rice Pilaf**
- Pimiento
- Chopped nuts
- Celery, diced
- Carrot, diced or grated
- Scallions
- Peas
- Green bell pepper, diced
- Spinach, chopped
- Mushrooms
- Olives, chopped or sliced
- Ham, diced or cut julienne
- Raisins or currants
- Water chestnuts
- Bacon
